Software Engineer II building training environments, evaluations, and data pipelines for AI agents. Previously built real-time voice agents, search infrastructure, and internal sales platforms at Scaler.

PROFESSIONAL EXPERIENCE

Software Engineer II

Feb 2026 - Present

Evaratus AI (formerly Scaler AI Labs)

Bengaluru, India

- Build desktop GUI environments for single and multi-agent systems as part of the founding engineering team; author SWE-Bench and Terminal-Bench tasks for agent evaluation.
- Work with 3+ frontier AI labs across the world on model evaluation across more than 5 workstreams, using Python, TypeScript, Playwright, and Docker.
- Process task traces into training data, build internal research tools, and mentor junior engineers.

Software Engineer I

Jul 2024 - Jan 2026

Scaler by InterviewBit

Bengaluru, India

- Built an in-house CRM replacing LeadSquared, reducing annual costs by 90% (INR 5.4 crore+) with 100% team adoption in 4 months. Owned frontend architecture, permissions across 12+ modules, and a React Flow workflow builder.
- Built Elasticsearch lead filtering across 3M+ leads and 100K+ monthly queries with sub-millisecond search latency; used Next.js and Turborepo for the CRM frontend.
- Led engineering for a real-time sales voice agent using Gemini, Deepgram, ElevenLabs, Redis, and WebRTC; supported 15+ concurrent calls at under 800 ms average latency.
- Built a Python/FastAPI call audit pipeline for 10K+ calls/month, with 94% precision on flagged issues and review tools for compliance teams.
- Built a sales training simulator with 40+ AI personas and an evaluation harness; increased practice volume 5x and cut ramp-up time by 6 weeks.

Software Engineer Intern

Mar 2023 - Jul 2024

Scaler by InterviewBit

Bengaluru, India

- Built mentor scheduling in Ruby on Rails and React, reducing no-shows from 11% to 3%; received the Needle-Mover Award.
- Built self-service admin tools that reduced weekly support tickets from 30 to 12, saving 100+ engineering hours per year. Improved article delivery for 500K+ MAU with lazy loading and server-side pagination.

Full-Stack Developer Intern

Sep 2022 - Jan 2023

SCSET, Bennett University

Greater Noida, India

- Built Django admin dashboards to visualize inter-school activity data and support monitoring by university staff.

SKILLS

Languages: TypeScript, JavaScript, Python, Ruby, SQL, C++

Frameworks: React, Next.js, Node.js, FastAPI, Ruby on Rails, Django

AI & evaluation: Agent environments, SWE-Bench, Terminal-Bench, Gemini, OpenAI, Deepgram, ElevenLabs

Infrastructure & data: AWS (ECS, EC2, RDS, MSK), Docker, PostgreSQL, Elasticsearch, OpenSearch, Redis, Kafka

Tools: Playwright, React Flow, Redux, Turborepo, Git

EDUCATION

Bennett University

Aug 2020 - Apr 2024

Bachelor of Technology in Computer Science

CGPA: 9.8/10; top 1% of the class of 2024.

3rd among 50+ teams at Bennett University's Agile Hackathon for C-Secure, a YouTube comment analysis tool.
